BASIC ELECTRICAL & INTRODUCTION TO PLC TRAINING

I-100: Introduction to Ladder Logic & Programmable Controllers

Course Description

This 16-hour course is designed to present an introduction to electrical control devices, ladder logic diagramming, wiring, and programmable controllers. Application exercises are used throughout the course to create a hands-on learning environment.

Tuition: \$950.00

Scheduled Course Dates

January 4-5, **2010**
May 3-4
September 7-8

E-100: Introduction to Electrical Control & Electrical Safety

Course Description

This 32-hour course is designed to familiarize entry-level electricians, equipment operators and other skilled trades with electrical control fundamentals, electric terminology, and basic troubleshooting techniques.

Tuition: \$1,350.00

Scheduled Course Dates

February 22-25, **2010**
June 28-July 1
October 4-7

ALLEN-BRADLEY CONTROLLOGIX PLC'S

A-6000: Allen-Bradley ControlLogix Programmable Controllers/Level One Maintenance & Troubleshooting

Course Description

This 36-hour training program provides students with hands-on experience in the troubleshooting and maintenance of the Allen-Bradley ControlLogix Programmable Controller. Hardware and software troubleshooting techniques are heavily emphasized throughout the course. Troubleshooting techniques include interpretation of status indicators, diagnostic messages and use of the programming terminal to quickly isolate faults and take proper corrective actions. The instructor will use examples of actual troubleshooting experiences to enhance the learning process.

Tuition: \$1,350.00

Scheduled Course Dates

January 4-8, **2010**
March 1-5
May 3-7
July 12-16
September 13-16
November 1-5

INTELLECT CONTROLS GROUP, INC

2010 Kentucky Training Center Schedule

Schedule is subject to change without notice

A-6200: Allen-Bradley ControlLogix Programmable Controllers/Level Two Advanced Maintenance & Troubleshooting

Course Description

This 36 hour training program provides students with hands-on experience using the advanced control and diagnostic capabilities of the Allen-Bradley ControlLogix Programmable Controller and the RSLogix5000 programming software package. Application troubleshooting exercises are used throughout the course to give students hands-on experience solving typical problems encountered in the factory.

Tuition: \$1,350.00

Scheduled Course Dates

January 11-15, 2010
March 8-12
May 10-14
July 19-23
September 20-24
November 8-12

A-6300: Allen-Bradley ControlLogix Programmable Controllers/Level Three Advanced Network Communication and Troubleshooting

Course Description

This 36-hour class provides participants with hands-on experience in the troubleshooting and maintenance of the Allen-Bradley ControlNet, DeviceNet and EtherNet communications networks. Hardware and Software troubleshooting techniques are heavily emphasized throughout the course.

Tuition: \$1,350.00

Scheduled Course Dates

January 18-22, 2010
March 15-19
May 17-21
July 26-30
September 27-October 1
November 15-19

A-6400: Allen-Bradley ControlLogix Motion - Maintenance and Troubleshooting

Course Description

This 32-hour course will provide the student with the knowledge and skills to identify, install, configure and troubleshoot a closed loop motion control system in the Logix 5550 architecture. In addition, students will learn specific programming instructions used for motion control in ControlLogix ladder logic programs. Students will also learn how to interface ControlLogix 5550 system with either Ultra 3000 or Kinetix 6000 Servo Drives.

Tuition: \$1,350.00

Scheduled Course Dates

January 25-28, 2010
March 22-25
May 24-27
August 2-5
October 4-7
November 29-Dec 3

INTELLECT CONTROLS GROUP, INC

2010 Kentucky Training Center Schedule

Schedule is subject to change without notice

ROCKWELL RS-500 SOFTWARE

A-6120: RS-5000 ControlLogix Function Block Diagrams

Course Description

This 16-hour training program is for those familiar with Allen-Bradley ControlLogix controllers, but not familiar with Function Block Diagrams. In this course students will learn how to program, interpret, and troubleshoot ControlLogix programs written with Function Block diagrams.

Tuition: \$950.00

Scheduled Course Dates

August 9-10, **2010**

A-6130: RS-5000 ControlLogix Structured Text

Course Description

This 24-hour training program is for those familiar with Allen-Bradley ControlLogix controllers, but not familiar with the Structured Text. In this course students will learn how to program, interpret, and troubleshoot ControlLogix programs written using Structured Text.

Tuition: \$950.00

Scheduled Course Dates

August 16-18, **2010**

A-6140: ControlLogix RS-5000 Sequential Function Chart

Course Description

This 8-hour training program will enable a student to create, enter, and troubleshoot a Sequential Function Chart. Topics covered include Sequential Chart Layout, Entering and Debugging a SFC, and Troubleshooting equipment controlled by an SFC.

Tuition: \$475.00

Scheduled Course Dates

August 23, **2010**

INTELLECT CONTROLS GROUP, INC

2010 Kentucky Training Center Schedule

Schedule is subject to change without notice

ALLEN-BRADLEY PLC-5 FAMILY

A-510: Allen-Bradley PLC-5 Family Programmable Controllers Level One Maintenance & Troubleshooting

Course Description

This 36-hour training program provides students with hands-on experience in the troubleshooting and maintenance of the Allen-Bradley PLC-5 family of programmable controllers. Hardware and software troubleshooting techniques are heavily emphasized throughout the course. Troubleshooting techniques include interpretation of status indicators, diagnostic messages and use of the programming terminal to quickly isolate faults and take proper corrective actions. The instructor will use examples of actual PLC-5 troubleshooting experiences to enhance the learning process.

Tuition: \$1,350.00

Scheduled Course Dates

February 8-12, **2010**
May 10-14
July 12-16
September 13-17
November 1-5

A-520: Allen-Bradley PLC-5 Family Programmable Controllers Level Two Advanced Maintenance & Troubleshooting

Course Description

This 32-hour training program allows students to gain hands-on experience using the advanced control & diagnostic capabilities of the PLC-5 programmable controller. Application troubleshooting exercises are used throughout the course to give students actual hands-on experience solving typical problems encountered in the factory.

Tuition: \$1,350.00

Scheduled Course Dates

February 15-19, **2010**
May 17-20
July 19-22
September 20-23
November 8-11

A-650: Allen-Bradley PLC-5/Level Three Analog I/O and PID Maintenance & Troubleshooting

Course Description

This 32-hour course is designed to provide engineering and maintenance personnel with a functional understanding of Analog I/O hardware and software and operation of the PID instruction in the Allen-Bradley PLC-5 programmable logic controller. The course consists of hands-on experience utilizing the 1771-IFE, 1771-OFE analog modules and the PLC-5 Programmable Controller.

Tuition: \$1,350.00

Scheduled Course Dates

Call for dates

ALLEN-BRADLEY DEVICENET COMMUNICATIONS

A-800: Allen-Bradley DeviceNet Communications

Course Description

This 16 hour course will familiarize personnel with DeviceNet Hardware/Software, and how they interface to the Allen-Bradley PLC-5. Each student will be required to set up a network, add devices to the network and troubleshoot these devices using the required software.

Tuition: \$950.00

Scheduled Course Dates

January 6-7, 2010
May 5-6
September 9-10

ALLEN-BRADLEY SLC-500 FAMILY PLC'S

A-5000: Allen-Bradley SLC-500/Level One Maintenance & Troubleshooting

Course Description

This 36 hour training program allows students to gain hands-on experience in the troubleshooting and maintenance of the Allen-Bradley SLC-500 programmable controller. Hardware and software troubleshooting techniques are heavily emphasized throughout the course. The instructor will use example of actual troubleshooting experiences to enhance the learning process.

Tuition: \$1,350.00

Scheduled Course Dates

January 4-8, 2010
April 5-9
August 2-6
December 6-10

A-5200: Allen-Bradley SLC-500/Level Two Advanced Maintenance & Troubleshooting

Course Description

This 32-hour training program allows students to gain hands-on experience using the advanced program instructions and communications features of the Allen-Bradley SLC-500 programmable controller. Application projects emphasizing hardware and software troubleshooting techniques are used throughout the course to create a hands-on learning environment.

Tuition: \$1,350.00

Scheduled Course Dates

January 11-14, 2010
April 12-14
August 9-13
December 13-16

INTELLECT CONTROLS GROUP, INC

ROCKWELL RSLINX SOFTWARE

RSL-100: Rockwell Software RSLinx Software

Course Description

This 8-hour (1-day) course allows students to gain hands on experience using Rockwell software RSLinx software to configure, understanding, and troubleshooting PLC communications for Allen-Bradley SLC-500, MicroLogix and PLC-5 systems.

Tuition: \$475.00

Scheduled Course Dates

February 22, **2010**
June 28
November 15

HMI – HUMAN MACHINE INTERFACE

A-760: ROCKWELL FactoryTalk View ME HMI Software Maintenance & Troubleshooting

Course Description

This 36 hour training program is designed for the maintenance troubleshooter to enable them to use PanelView Plus terminals, FactoryTalk View ME and FactoryTalk View Studio to assist in correcting line stoppages and errors. Emphasis is on troubleshooting rather than on programming, although exposure to the many software features is included. It is assumed that the technician will be using existing FactoryTalk View ME, Communications, and PLC programs.
RS-5 or RS-500: RSLogix 5 or RSLogix 500 Software for Allen-Bradley PLC-5 or SLC-500 Skills Conversion to RSLogix/MS Windows Software.

Tuition: \$1,350.00

Scheduled Course Dates

February 1-5, **2010**
June 14-18
October 18-22

A-770: Rockwell FactoryTalk View SE Maintenance & Troubleshooting

Course Description

This 36-hour course is designed for the maintenance troubleshooter to enable him or her to use FactoryTalk View Studio programs and FactoryTalk View Client to assist in correcting line stoppages and errors. Emphasis is on troubleshooting rather than programming. It is assumed the technician will be using existing FactoryTalk View SE projects, Communications and PLC programs.

Tuition: \$1,350.00

INDUSTRIAL CONTROL SOFTWARE

RS-5 or RS-500: RSLogix 5 or RSLogix 500 Software for Allen-Bradley PLC-5 or SLC-500 Skills Conversion to RSLogix/MS Windows Software

Course Description

This 16-hour training program familiarizes students with the program and diagnostic features of the Rockwell features of the Rockwell 5/RSLogix-500 software package for the Allen-Bradley PLC-5/SLC-500. Students gain hands-on experience using the powerful Windows-based programming, documentation and troubleshooting features of the RSLogix package.

The objective of these courses is to transfer existing knowledge of AI Series, APS Series or 6200 Series DOS-based software to a Windows-based environment.

Tuition: \$950.00

Scheduled Course Dates
call for dates

ALLEN-BRADLEY PANELVIEW OPERATOR TERMINALS

A-700: Allen-Bradley PanelView 1000e, 1200e 1400e Enhanced Operator Terminal Editing & Troubleshooting

Course Description

This 32-hour training program allows students to gain hands-on experience using Allen-Bradley PanelView 1000e, 1200e, & 1400e Operator Terminals with the Windows-based PanelBuilder software to troubleshoot interface and process problems. Emphasis is placed on interaction of the PanelView and the PLC in an integrated process environment.

Troubleshooting includes system hardware, messages and alarms and the use of a PanelView, and a programming terminal to quickly locate faults and take corrective action.

Tuition: \$1,350.00

Scheduled Course Dates

MOTOR DRIVE TRAINING

MC-100: AC and DC Variable Speed Motor Drive Maintenance & Troubleshooting

Course Description

This 36-hour hands-on training program is designed to provide maintenance electricians with a thorough understanding of AC and DC motor construction, operation and variable speed control. Hands-on lab exercises are used throughout the training program to simulate actual plant conditions. Course hardware will include Variable Frequency AC and DC Motor Drive Workstations, Circuit Test Workstations, Oscilloscopes and Multimeter test equipment. Hands-on labs will explain operation and troubleshooting of diodes, transformers, SCR's, transistors and other electrical control devices.

Tuition: \$1,350.00

Scheduled Course Dates

February 8-12, **2010**
May 3-7
August 2-6
November 1-5

MC-200: Allen-Bradley 1336 Plus/Plus II Variable Frequency Motor Drives Maintenance & Troubleshooting

Course Description

This 32-hour hands-on training program will provide maintenance electricians and engineers with the required knowledge and skills to install, start-up and troubleshoot Allen-Bradley 1336 Plus AC Drive systems. Emphasis is on using the Human Interface Module and DriveTools software to set and check parameters used in normal operation and for troubleshooting. Students will locate power, signal and control terminals, monitor drive conditions, clear faults and be able to troubleshoot drive and motor problems.

Tuition: \$1,350.00

MC-300: Allen-Bradley 1394 GMC Digital Motion Controller Maintenance & Troubleshooting

Course Description

This 36-hour hands-on training program is designed for technicians, electrical maintenance personnel and engineers responsible for installing, troubleshooting and maintaining the Allen-Bradley 1394 GMC Digital Motion Controller. Students will learn the basics of motion control and AC servo drive systems. Using Allen-Bradley's GML Commander Software, students will be required to setup, tune, program motion, and diagnose 1394 system faults. They will understand hardware variations, power and control wiring, and interface methods for the 1394 GMC Digital Motion Controller family. Hardware and software troubleshooting are heavily emphasized in this course and hands-on labs provide real world experience for the individual student.

Tuition: \$1,350.00

Scheduled Course Dates

Call for Dates

MC-700: Allen-Bradley PowerFlex 70/700 Variable Frequency Motor Drives Maintenance & Troubleshooting

Course Description

This 32-hour hands-on training program is designed to provide maintenance electricians and engineers with the required knowledge and skills to install, start-up and troubleshoot Allen-Bradley PowerFlex 70/700 Variable Frequency AC Drive systems. Emphasis is on using the Human Interface Module and DriveExplorer software to set and check parameters used in normal operation and for troubleshooting. Students will locate power, signal and control terminals, monitor drive conditions, clear faults and be able to troubleshoot drive and motor problems.

Tuition: \$1,350.00

September 27-30

FANUC CNC TRAINING

NC-100: Fanuc CNC Basic Machine Troubleshooting

Course Description

This 36 hour course is designed for technicians who will be troubleshooting Fanuc controlled machinery. It will concentrate on the use of ladder logic and various diagnostic screens to troubleshoot machine problems. During the course the student will examine the ladder logic in detail for one machine. During this process we will also cover various programming techniques used by other machine builders. Multiple circuits, including M-codes, spindle commands, interlocks and alarms, will be covered

Tuition: \$1,500.00

Scheduled Course Dates

January 18-22, **2010**
April 12-16
July 12-16
October 18-22

NC-200 Fanuc CNC Advanced Machine Troubleshooting

Course Description

This 36 hour course is designed for technicians who will be troubleshooting CNC equipment with Fanuc controls. We will emphasize the importance for technicians to fully understand how the electronics and mechanics interact in order to troubleshoot a problem. The course will cover the three primary areas of CNC troubleshooting:

- Electrical
- Mechanical
- Environmental

Tuition: \$1,500.00

Scheduled Course Dates

February 15-19, **2010**
April 19-23
May 10-14
August 9-13
November 15-19

NC-300: Using Fanuc Ladder Logic and Diagnostics for Troubleshooting

Course Description

This 36 hour course is designed for technicians who will be troubleshooting Fanuc controlled machinery. It will concentrate on the use of ladder logic and various diagnostic screens to troubleshoot machine problems. During the course the student will examine the ladder logic in detail for one machine. During this process we will also cover various programming techniques used by other machine builders. Multiple circuits, including M-codes, spindle commands, interlocks and alarms, will be covered.

Tuition: \$1,500.00

Scheduled Course Dates

March 15-19, 2010

NC-400: Fanuc G Code (Tool Path) Programming

Course Description

This 36 hour course will teach students the fundamentals of basic programming. Students learn Cartesian Coordinate Systems, G codes, basic M codes, word address, canned cycles, cutter radius compensation, and sub programs. Participants will be given many different examples, as well as write many programs. Safety lines and technique will be covered.

Tuition: \$1,500.00

Scheduled Course Dates

Call for dates

NC-500: Fanuc Macro and Option Training

Course Description

This 36 hour course will instruct the students in the use of custom macro programming and special options for Fanuc controls. The students will learn to use these powerful functions to increase machine efficiency and reduce cycle times. This is a very intense course with a considerable amount of time spent writing and executing programs.

Tuition: \$1,500.00

Scheduled Course Dates

May 17-21, 2010

INTELLECT CONTROLS GROUP, INC

2010 Kentucky Training Center Schedule

Schedule is subject to change without notice

FLUID POWER TRAINING

H-100: Troubleshooting Industrial Hydraulics/Level One

Course Description

This 32 hour course focuses on industrial hydraulic systems. We place emphasis on understanding the basic hydraulic fundamentals utilized in all industrial hydraulic systems; the participant will learn to effectively to setup, adjust and troubleshoot industrial hydraulic systems. The participant will apply practical hands on exercises for each basic principle covered in the class. These hands on exercises will be executed utilizing real world hydraulic adjustments and calibrations as used in actual systems. We focus heavily on teaching proper safety procedures, and strictly enforce these procedures to assure participants learn and practice safe work habits. ISO 1219 Industrial hydraulic symbology will be taught and used throughout the class. The participant will utilize this symbology throughout the class, and learn from case history hydraulic prints. Proper adjustment procedures for pressure, flow, and directional control valves will be emphasized and applied.

Tuition: \$1,350.00

Scheduled Course Dates

January 11-14, **2010**
April 12-15
July 12-15
October 11-14

H-200: Troubleshooting Industrial Hydraulics/Level Two

Course Description

This 32 hour course focuses on advanced troubleshooting of industrial hydraulic systems using in-plant schematics. The participant will practice hands on troubleshooting skills on our industrial hydraulic trainers. This course is designed to raise the skill level of the hydraulic mechanic to the hydraulic technician level. The participant will calculate proper sizing of hydraulic pumps, actuators, valves, and piping. Hydraulic servo and proportional valve function, operation, terminology, and setting procedures will be covered; a background in electronics is not necessary. Topics covered will also include; pressure intensifiers, air-over-oil, and pressure compensated pumps. ISO 1219 Industrial hydraulic symbology will be used and reinforced. Course can be customized to meet specific client needs, i.e.; researching in-plant equipment specs, updating in-plant schematics, hands on testing preparation, basic electronic control of hydraulic systems, or covering plant specific topics or equipment.

Tuition: \$1,350.00

Scheduled Course Dates

January 18-21, **2010**
April 19-22
July 19-22
October 18-21
